

WATER

OVERVIEW

SDEM Erectors provides a full range of water engineering and construction services. We plan, design and install facilities that meet complex drinking water requirements, rehabilitate aging infrastructure through innovative solutions, fabricate and construct water reticulation systems.

In partnership with OEMs we offer turnkey EPC solutions for the design and installation of water treatment plants.

Our clients include private companies, multinationals and governments.

WATER SERVICES

Our water projects scope and capacity includes the following:

- Turnkey design & installation of water treatment plants
- Design, supply, prefabrication and erection of distribution piping networks
- Water Intakes & pumping stations
- Storage tanks (supply, fabrication & erection)
- Valves (supply & erection)
- Associated steel structures (supply, fabrication & erection)
- Rehabilitation & extension of plants

SDEM WATER SECTOR - FEATURED PROJECTS

Project: Geregu 414MW Power Plant.

Services: Fabrication and erection of 1,000m³ raw water tank and piping connections

Period: 2005 - 2006

Project: Ajaokuta Water Supply, under Dumez for ASCL

Services: Ajaokuta Steel Plant – Water Supply Lines (3,800 Tons of Cast Iron Pipes)

Period: 1981 - 1993

Project: Itakpe Water Supply
Services: Turnkey contract for water intake, pumping station, main distribution lines (18km) and water storage tanks

Period: 1992 - 1993
